

I Get UP

I get up I get up Everyday
I get up I get up Anyway

Got to take a lift For still we must endure
The trials that we face Oh the wars that we know
Patience give us virtue For The seeds we must sow

I get up I get up Everyday
I get up I get up Anyway

See the light today Hey, you know we got to find a way
We been through a lot of shift Baby the race isn't for the
swift
So smile with the sunrise There's a lot of life to live

I get up I get up Everyday
I get up I get up Anyway
Been to the dark place

Surviving the hate It tries to bring you down
Oh the world is just that way And through the noise a
whisper
Arise and awake

I get up now I get up now Everyday
I get up I get up Anyways

When all the doors are closed
There's only one thing to do
It always makes it hard
Sometimes you got to break the rules
And no one else can walk
In your shoes

I get up I get up Everyday
I get up I get up Anyway

I get up now I get up now Everyday
I get up I get up Anyways

I get up I get up Everyday
I get up I get up Anyway

I get up I get up Everyday
Now, I get up up Anyway
